TRAN VAN DU

Job intention : Fullstack Developer

Thu Duc, Ho Chi Minh City | 0358768117
tranvandu1409@gmail.com | Profile: https://tranvandu-profile.vercel.app

Career Goals

- Fresher Fullstack Developer with strong foundation in Java, Spring Boot, and ReactJS/AngularJS. Experienced in building RESTful APIs, implementing authentication & authorization with Spring Security, and developing fullstack web applications through academic and internship projects.
- Quick learner with strong problem-solving skills, adaptable to new technologies, and eager to grow in a professional software development environment. Available for full-time work and committed to contributing effectively to team success.

Education

Ho Chi Minh City University of Technology and Education (HCMUTE) **12/2022 - Currently**

- Software Development
- GPA: 3.63

Ho Chi Minh City University of Technology (HCMUT) **10/2015 - 10/2019**

- Aeronautical Engineering

Skills

Professional Skills

- **Programming Languages:** Java, JavaScript, C++.
- **Frontend:** AngularJS, ReactJS, HTML5, CSS3, Bootstrap, TailwindCSS.
- **Backend:** Spring boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate RESTful APIs
- **Databases:** MySQL, SQL Server, MongoDB.
- **Tools & Platforms:** Git, GitHub, GitLab, Postman, Docker, IntelliJ IDEA, Visual Studio Code.
- **Concepts:** OOP, JWT Authentication, OAuth2, MVC Architecture, Role-Based Authorization.

Soft Skills

- Self-learning, critical thinking, logical thinking, problem-solving skills.
- Ability to work under high pressure & flexibility, team working, good communication.
- Time management skills & effective work arrangement.

Experience

Backend Developer (Intern & Fresher) **06/2025 - 10/2025**

Ho Chi Minh City University of Technology and Education (HCMUTE)

- Built RESTful APIs using Java & Spring Framework;
- Implemented data persistence with Spring Data JPA & Hibernate;
- Developed backend features supporting web applications (CRUD, services, controllers);
- Integrated APIs with frontend teams (Angular);
- Implemented secure login, role-based access, and session handling using Spring Security;
- Write tests with JUnit, Mockito; test API with Postman with sample data.
- Fixed bugs (if have); collaborated in team, and worked as assigned by superiors.

Fullstack Developer (Intern) **10/2024 - 02/2025**
SCS Company

- Built frontend features using AngularJS;
- Developed backend APIs using Java;
- Integrated UI with database and REST services;
- Built reusable UI components and backend services, reducing development time for new features;
- Supported data management with Hibernate/JPA and SQL Server;
- Debugged and resolved software defects to ensure application stability.

Personal Projects

Minlish – English Learning Platform | Personal Project **02/2026 - 03/2026**
Team size: 1 people
Role: Fullstack Developer · System Designer · UI & Database Designer
GitHub: https://github.com/Zr1409/Minlish_Fullstack
Link website: https://minlish-websites.vercel.app
Description: Developed a fullstack English vocabulary learning platform that helps users improve retention through flashcards, spaced repetition, and progress tracking. Designed a scalable separated frontend/backend architecture with secure authentication and responsive UI.
Key Features:

- User registration/login with JWT Authentication & Google OAuth2
- Vocabulary set management (CRUD), flashcards, study sessions
- Spaced Repetition (SM-2) algorithm for smart review scheduling
- Import/Export vocabulary via CSV/XLSX
- Dashboard with learning statistics and retention tracking
- In-app notifications & email reminder settings
- Responsive modern UI for desktop/mobile users

Technologies: Java, Spring Boot, Spring Security, JPA/Hibernate, ReactJS, TypeScript, Vite, TailwindCSS, MySQL, RESTful API, JWT, OAuth2.

TalentHub – Freelancer Platform **03/2025 - 06/2025**
Team size: 2 people
Role: Leader · UI & Database Designer · Full Stack Developer
GitHub: https://github.com/Zr1409/TalentHub_Freelancer_Platform
Description: A freelancer job-finding platform enabling job posting, applications, secure transactions, and online interviews. Built reusable UI components and integrated AI Chatbot for user support.
Key Features:

- User registration/login with Spring Security (encrypted password);
- Two-Factor Authentication (2FA) for enhanced security;
- Job search by skills, category, salary, and location;
- Freelancers: create profiles, upload CV/portfolio, job applications;
- Employers: post jobs, manage applications, review applicants;
- Online interview (video call integration) & messaging with real-time notifications;
- Admin dashboard for managing users, jobs, and transactions;
- AI Chatbot integration to assist users during job search and hiring;

Technologies: Spring Boot, Spring Security, JPA/Hibernate, ReactJS, HTML/CSS/JS, Bootstrap, MySQL.

Online Book Sales Website – BookNest **12/2024 - 02/2025**
Team size: 2 people
Role: Leader · UI & Database Designer · Full Stack Developer
GitHub: https://github.com/Zr1409/BookNest

Description: An online bookstore that supports product search, ordering, payment, delivery tracking, returns, and admin management, designed with a user-friendly interface.

Key Features:

- User account management & role-based access;
- Search & filter by category, author, price;
- Manage shopping cart, order placement & real-time order tracking;
- Send automatic confirmation emails after ordering;
- Multiple online payment methods;
- Integrate the AI Gemini Chatbot for product guidance;
- Use GHN API (Fast Delivery) to look up shipping fees & delivery tracking;
- Revenue statistics (daily/monthly);
- Product returns & refund via e-wallet transactions.

Technologies: Java, Spring Boot, Spring Security, JPA/Hibernate, AngularJS, HTML/CSS/JS, Bootstrap, SQL Server, RESTful API, GHN API, Gemini API.

Certifications

- **HackeRank:** Java (Basic), Problem Solving (Basic), Rest API (Intermediate), SQL (Intermediate), SQL (Advanced).
